

Truen Video Encoders / Decoders

TCS-300 Single Channel Encoder / Decoder

Features

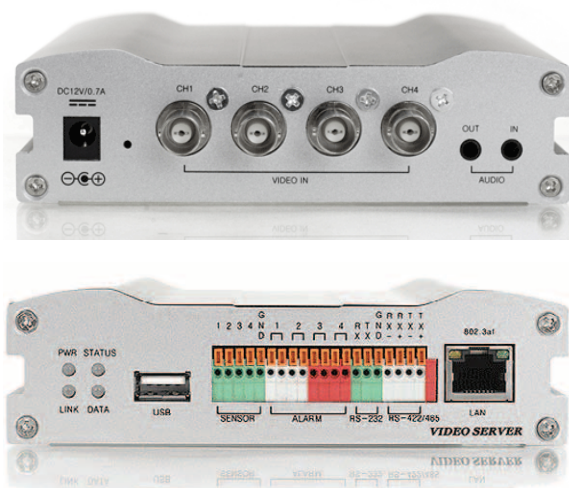

- Converts analogue to IP and vice versa
- can be accessed via built in webserver or can be used in pairs as a point to point (analogue in / analogue out) over a IP lan or wan
- DVR function via USB HDD with motion detect, schedule etc
- alarm inputs and outputs
- web based GUI

TCS-400 4CH Channel Encoder / Decoder

Features

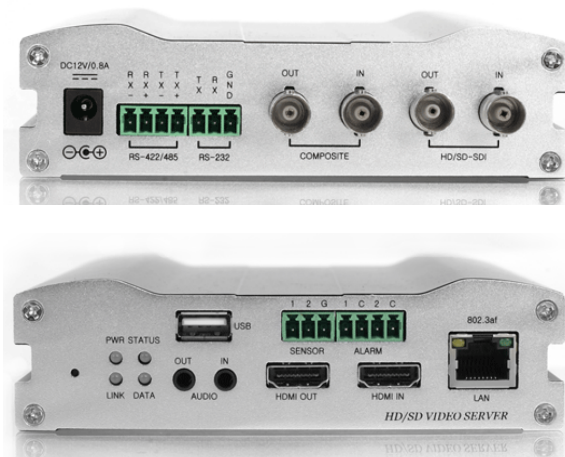

- Converts four analogue channels to IP. 25fps @ D1 per CH and vice versa
- can be accessed via built in webserver or can be used in pairs as a point to point (analogue in / analogue out) over an IP lan or wan
- can access a stream from TCS-300 for geographically diverse applications
- DVR function via USB HDD with motion detect, schedule etc
- alarm inputs and outputs
- web based GUI

TCS-2000 Single Channel HD Encoder / Decoder

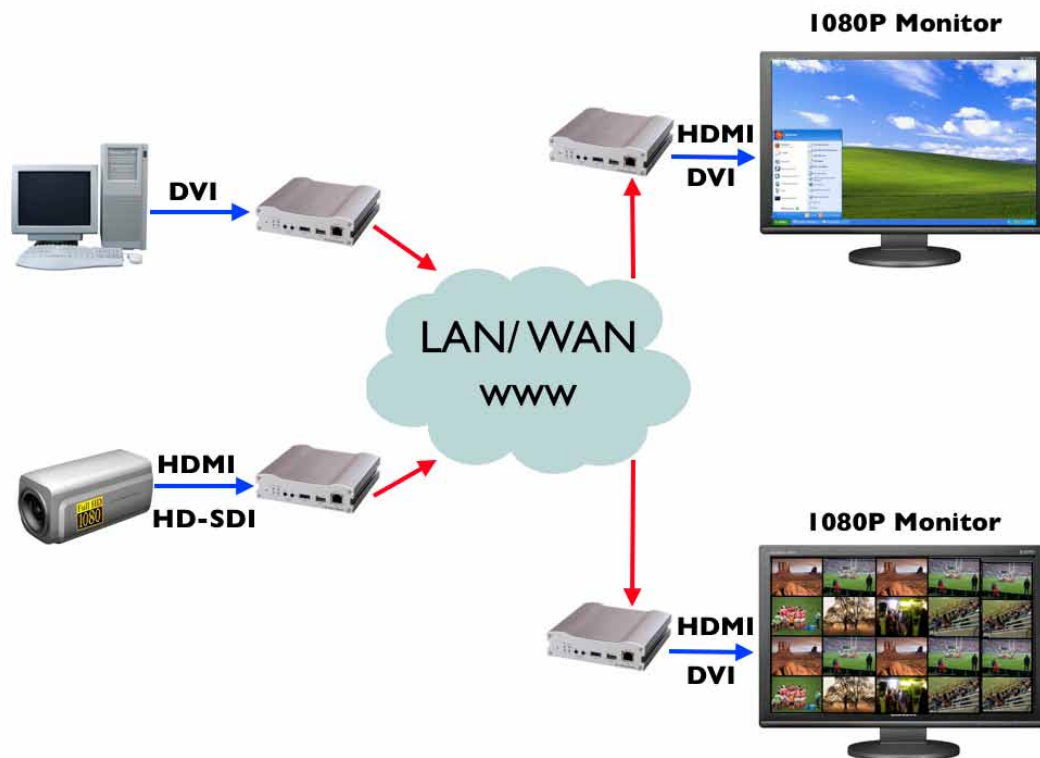

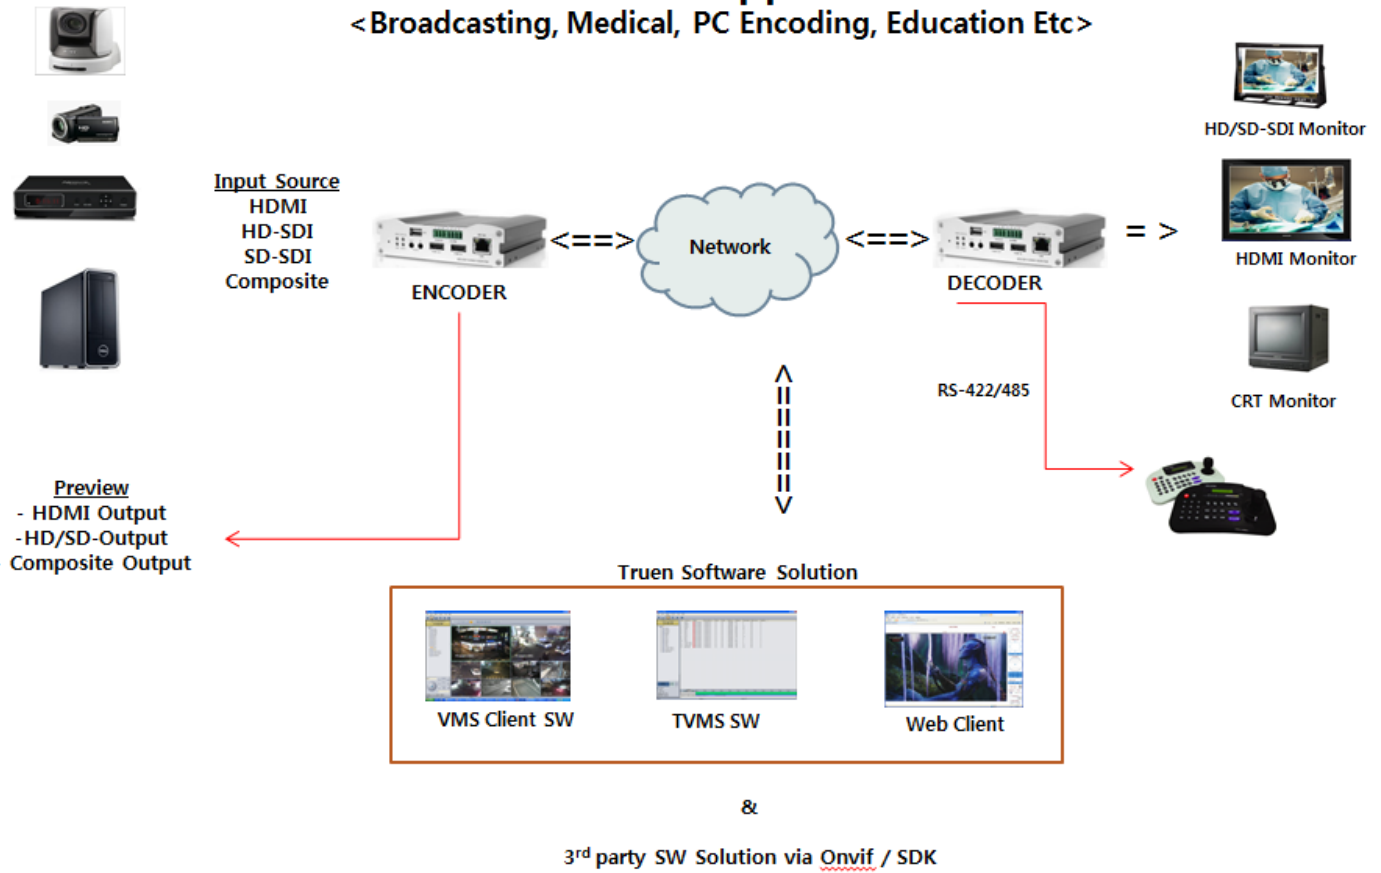

Features

- Encodes or decodes HD-SDI, HDMI or analogue to IP and vice versa
- can be accessed via built in webserver or can be used in pairs as a point to point (analogue, HDMI, HD-SDI in / analogue, HD-SDI, HDMI out) over an IP lan or wan
- can access a stream from TCS-300 for geographically diverse applications
- DVR function via USB HDD with motion detect, schedule etc
- alarm inputs and outputs
- web based GUI

TCS-2000 Application

< Broadcasting, Medical, PC Encoding, Education Etc >

Distributed in NZ/AU by

www.viewtech.co.nz, 0800 888 324

Manufactured by

Woolm EBiz Center, Seoul, Korea
